

SAFETY MEETING

Company Name: Superior Waterproofing Tool Talk #30 Date: 9/4/2020

Built on Safety

FORMEN – PLEASE DISCUSS SEPTEMBER’S TOOLBOX TALKS AS A GROUP AND EVERYONE ON SITE SIGN ONE SHEET.

This year’s Construction Safety Week (9/14-9/18) theme is Built on Safety. The next 5 weeks tool talks will follow this Safety Week Theme. Today, let’s discuss how we are **Built on Safety** as individuals, project teams, companies and an entire industry. Here’s what this year’s Construction Safety Week theme, **Built on Safety**, means:

Our industry is Built on Safety. The projects we proudly construct and design, the teams we work alongside and the companies we work for are all built on safety. From the moment we step onto a job site, safety is the foundation, the cornerstone of everything we do. We provide and use the tools and training needed to work incident free. We empower every person on every job site to make smart, measured and safe decisions. We speak up when we see something unsafe. We make a personal commitment to each other. These are the expectations when we are built on safety.

Safety is not a rule, it’s a value and belief we all share. When we make safe choices, lives are protected. We are built on safety because our families at home and at work depend on it.

It’s up to each of us to never let our guard down, to understand the impact of our actions, and to make certain that every decision, every operation, and every project is built on safety.

Discuss these questions with your crew. Possible answers are listed below each question.

- 1. What do we do as individuals and crews to be Built on Safety?**
 - a. *Wear proper PPE*
 - b. *Follow the work plan and be involved in the planning*
 - c. *Use your voice and speak up on matters of safety, stop work if you see something unsafe – be your brother and sister’s keeper*
- 2. What do we do as a project to be Built on Safety?**
 - a. *Confirm our site safety plans are current and verify they are being followed*
 - b. *Communicate expectations and have open communication with craft and staff*
- 3. How can we take the message of Built on Safety home to our families?**
 - a. *Be safe at home like we are at work because our livelihoods depend on it*
 - b. *Talk with our families about safe habits we should use every day – when we’re using tools, when we’re in the kitchen, when we’re driving, etc.*
 - c. *Have plans in place for natural disasters, severe weather, fires, etc. and discuss those plans with our family*
